BIOPRODUCTS - COLOMBIA

# Ford Biofuel Refinery and Land Plan

## Refinery Plan

Ford Biofuel will place a Biofuel Refinery on the property designated to your company. This refinery will be dedicated to your corporation with a minimum multi annually agreed upon contract. The proprietary micro refinery's developed by Ford Biofuel can produce 200,000 - 250,000 gals per day

### LAND PLAN

After contract is signed and deposit is received in Ford Biofuels Bank of America Account. A visit to the Colombian Property will be required by your company to view and inspect the area and to see the process of production from other locations. A property of 1000 Hectares (2400 Acres) will be made available to your company when you arrive. Depending on the agreed upon amount of fuel this land area could increase or decrease to meet your demand.

Keep in mind that the land and refinery is of no extra cost to you as Ford Biofuel Inc. owns both the land and refinery. This project will be developed for you as a value-added service and dedicated to your company as well and any and all employees needed to successfully operate the project.

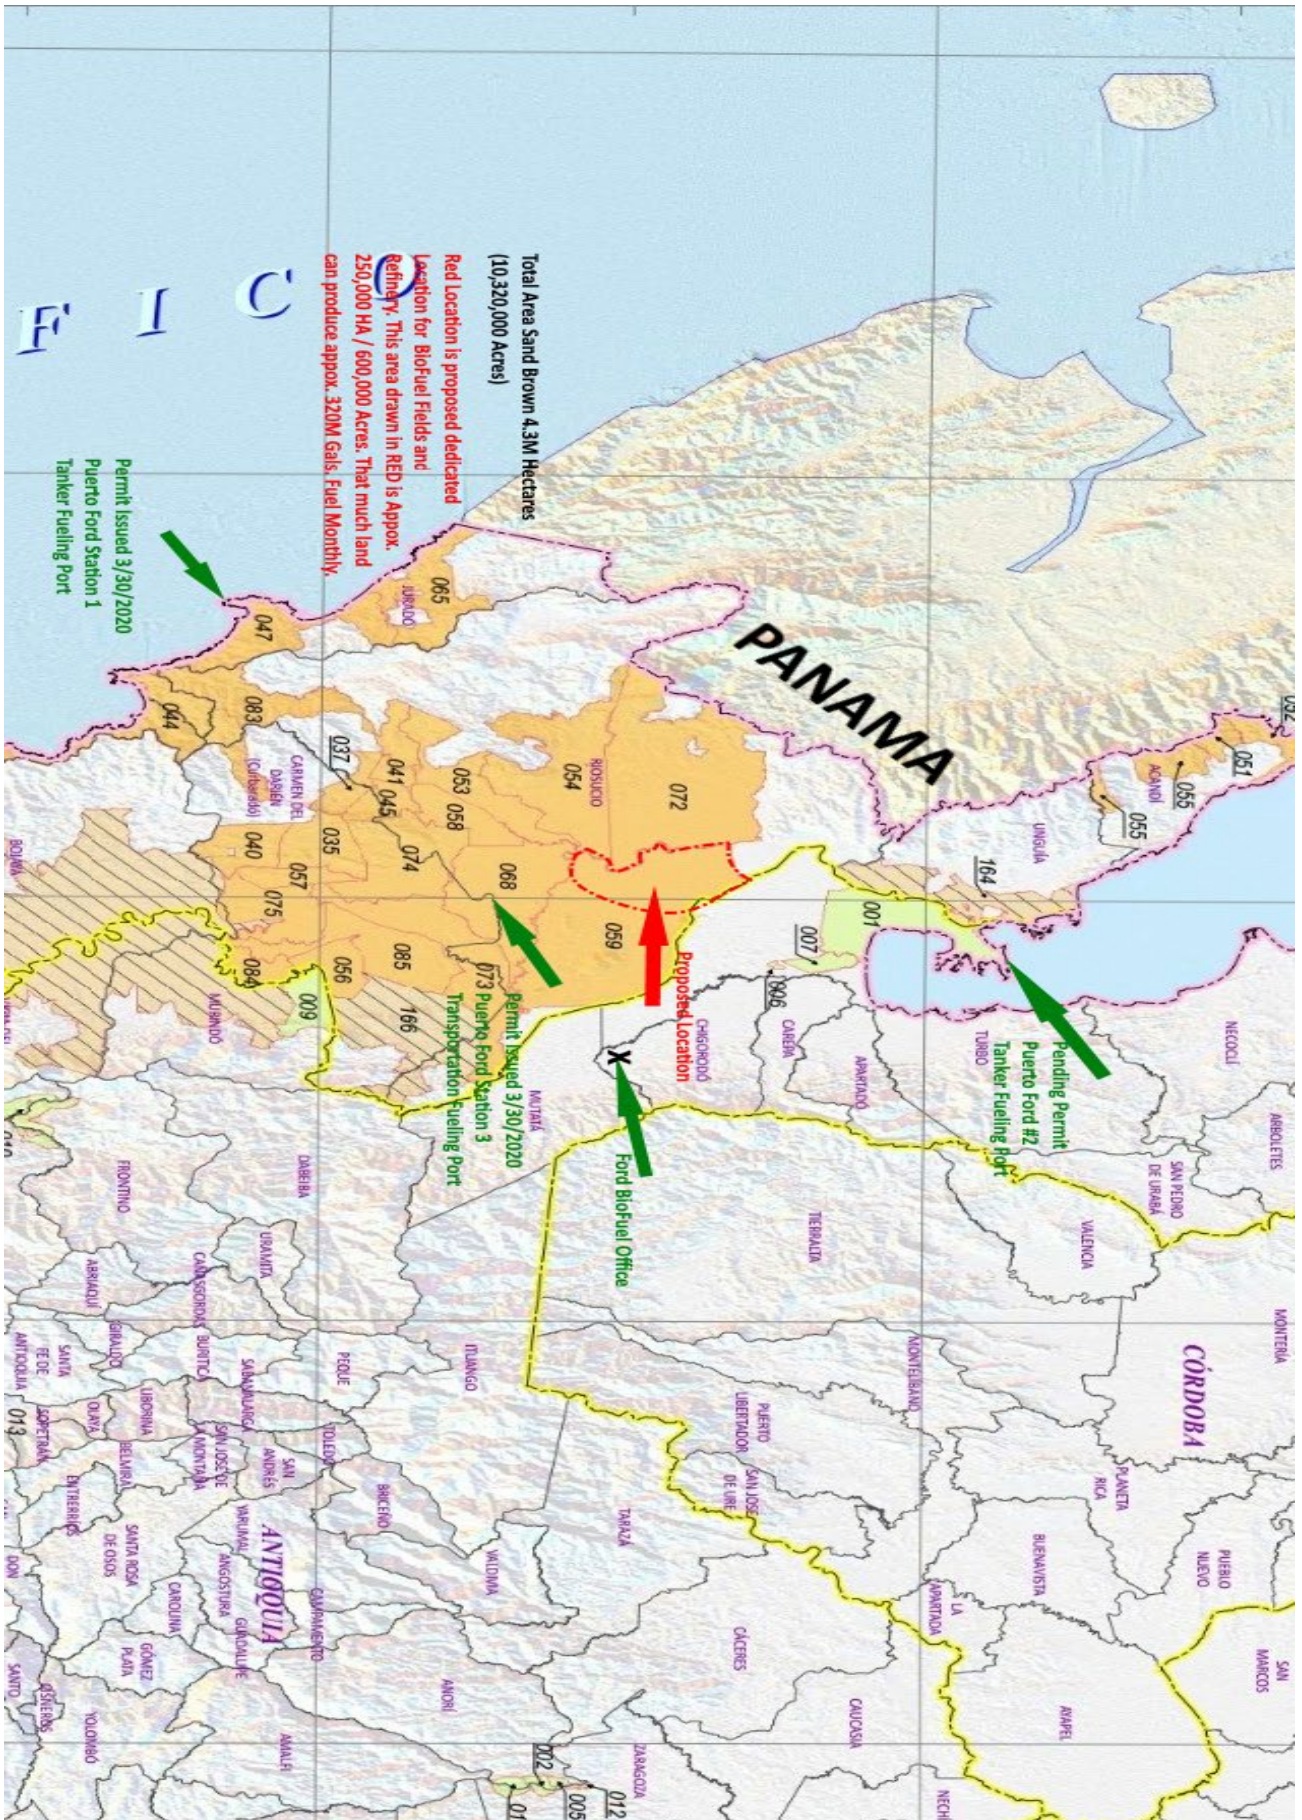

### MAP GRAPHIC (PAGE 3)

In red is the location is proposed to put your company's Industrial Bio Hemp fields and refinery. The area in red outline is 250,000 HA / 600k Acres. According to your demand this is 10X more than you need, but there is currently room for you to grow should you need more land due to sales.

In Green you will see four locations singled out.

We have gained permits by the Colombian Government to place two private Fuel Ports to fuel tankers, one in Zone 68 and one in Zone 47 on the Pacific side, Zone 001 is pending but will be issued this week one April 2020.

The X is the main office of Ford Biofuel Colombia S.A.S.

## SHIPPING

It is important to discuss the shipping process.

Once your tanker is filled and approved to departure. A date will be given with a 3 to 5-day time frame for delivery this takes into account wind speed, sea current speed, climate, and if any tropical storms or hurricanes are present. It is a Maritime Law that no Fuel Tanker will proceed in seas that have wave breaks higher than 15 feet and no Fuel Tanker shall proceed through any tropical storms or hurricanes and must port immediately at the nearest safe haven available to them, should such an occurrence take place. Ford Biofuel Inc. will not be responsible for any force majeure actions that can cause late delivery and will not condone any actions that violate Maritime Law or endanger the safety of the tankers crew. This is non-negotiable.

## CLOSING
